Fluorine is a chemical element with symbol *F* and atomic number 9. It is the lightest halogen and exists as a highly toxic pale yellow diatomic gas at standard conditions. As the most electronegative element, it is extremely reactive: almost all other elements, including some noble gases, form compounds with fluorine.. Among the elements, fluorine ranks 24th in universal abundance and 13th in ...

*Physical Geology*, by Brian J. Skinner and Stephen C. Porter A well written introductory textbook on physical geology with lots of figures. *The Solid Earth - An Introduction to Global Geophysics*, by C.M.R. Fowler This book has nothing to do with quartz but is about the inner workings of the planet earth, and it clearly addresses expert readers and undergraduate students of geology.
